Employee Survey Analysis

ABOUT THE DATA

The Dataset is an HR Employee Survey Dataset used to analyze employee satisfaction and organizational performance

DATA CHARACTERISTICS

-  **Type** : Survey Based dataset
-  **Records** : Multiple employee responses
-  **Data Type** : Structured + Categorical + Numeric
-  **Source** : Employee Feedback Server

DATA COLUMNS

COLUMNS INCLUDED

- **response_id**
- **status**
- **department**
- **director / manager / supervisor / staff**
- **question**
- **response (rating)**
- **response_text**

PROBLEM STATEMENT

Organizations face challenges in understanding employee satisfaction

Lack of visibility into employee feedback

Difficulty identifying low performance department

No structured way to analyze survey responses

Poor Decision making due to lack of data insights

Inability to track role based satisfaction trends

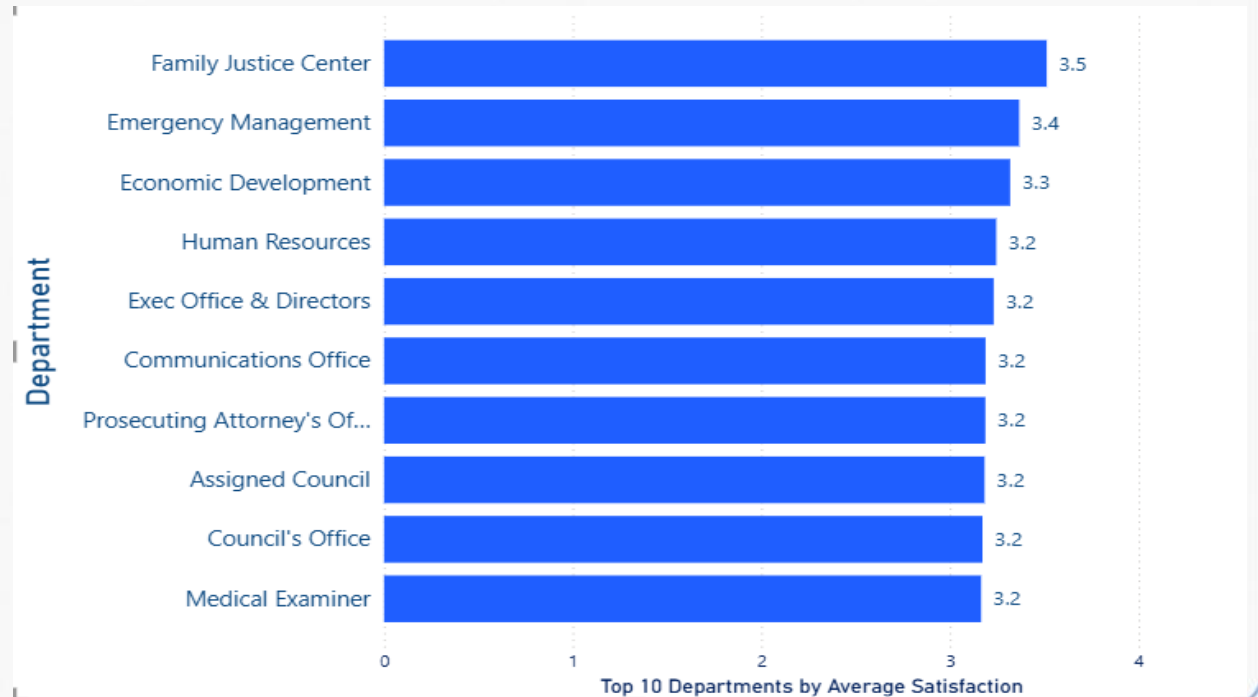

Need for data driven HR analytics system

DATA INSIGHTS – DEPARTMENT ANALYSIS

- Some department show higher satisfaction levels
- Certain departments have lower average response scores
- Indicates uneven employee experience across teams
- High variation suggest management differences

Top 10 Departments by Satisfaction Score

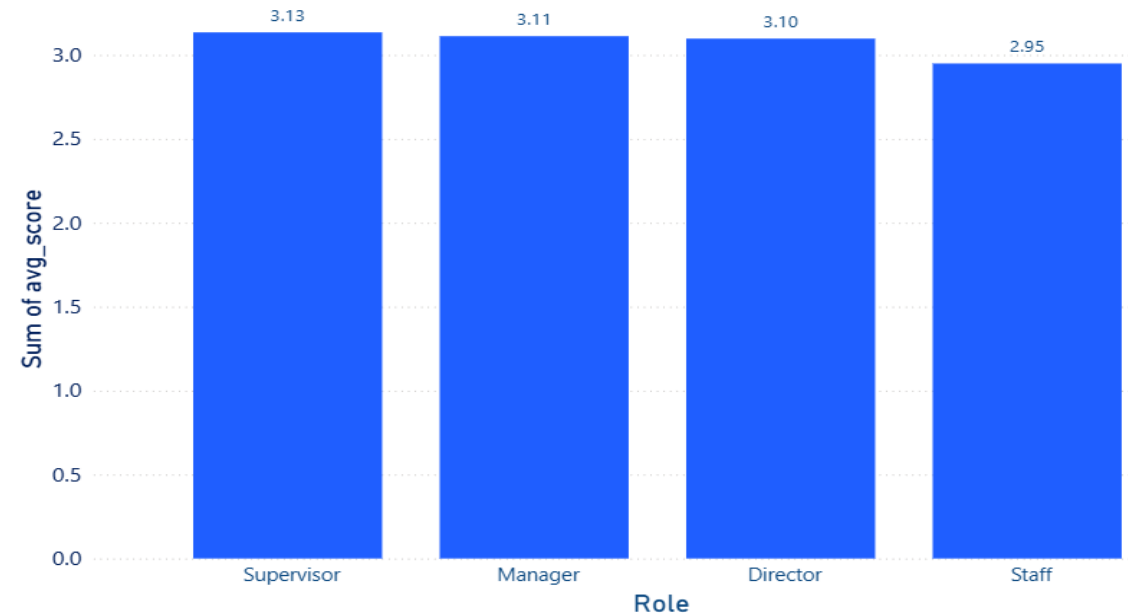

DATA INSIGHTS – ROLE-BASED ANALYSIS

- Directors/Managers often show higher satisfaction

- Indicates gap in experience across hierarchy
- Leadership communication strongly impacts employee morale.

**Average Satisfaction Score
By Role**

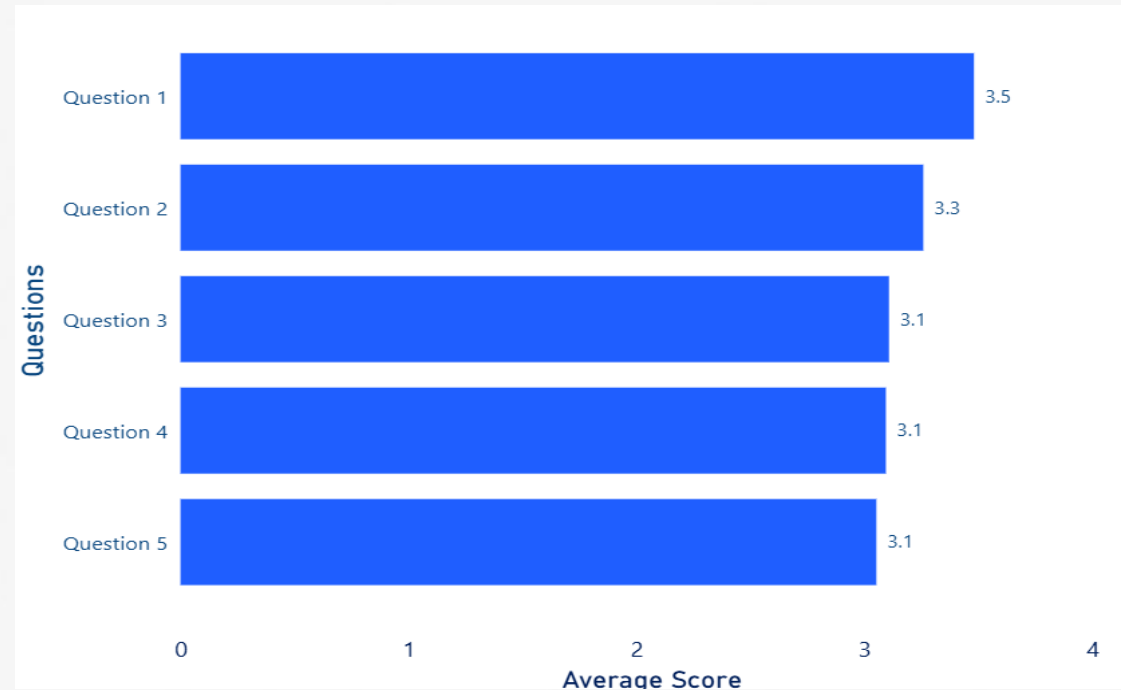

DATA INSIGHTS – EMPLOYEE ENGAGEMENT ANALYSIS

- Some question have consistently high scores
- Indicates strengths of organization
- Some questions have low scores
- Highlights problem areas
- Useful for identifying improvement areas

Top Employee Engagement Factors

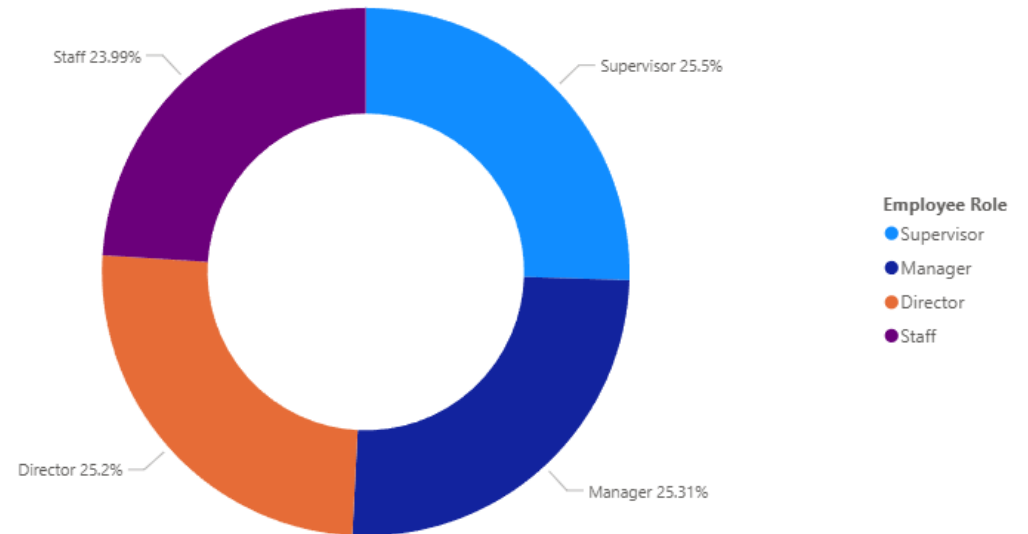

DATA INSIGHTS – LEADERSHIP ANALYSIS

- **Leadership roles show higher satisfaction**
- **Hierarchy differences influence workplace engagement.**
- **Leadership communication impacts morale**

Average Satisfaction Score by Employee Role

PROBLEM AREA IDENTIFIED

- **Low satisfaction in certain departments**
- **Potential impact on employee retention and productivity.**
- **Specific questions indicating dissatisfaction**
- **Lack of uniform employee experience**

PROPOSED SOLUTION

- 1 Centralized HR analytics dashboard
- 2 Department wise performance tracking
- 3 Role based satisfaction monitoring
Employee Survey Analysis
- 4 Continuous survey analysis system
- 5 Data driven decision making
- 6 Employee experience improvement strategy

CONCLUSION

- ✓ **SQL analysis provides clear insights into employee feedback**
- ✓ **Department and role differences impact satisfaction**
- ✓ **Survey data helps identify strengths and weaknesses**
- ✓ **PostgreSQL and Power BI together enabled effective HR analytics and data-driven decision-making.**

FUTURE SCOPE

- 1** AI-driven employee sentiment analysis
- 2** Predictive analytics for employee satisfaction
- 3** Real time survey monitoring
- 4** Employee attrition prediction
- 5** Advanced HR analytics system
